# Australian Eggs VR Update

Recommended Browsers + Tips for Using VR

Desktop Experience

- If viewing on a desktop device all content is presented in flat screen 2D format with 360° videos.
- Google Chrome offers the best viewing experience.
- This is applicable for WINDOW / PC & MAC users.
- Alternative suitable browsers are: Edge, Firefox and Safari.
- Note: If you are a MAC user viewing the content on Safari you are required to press play before every video.

Mobile Phone VR

To view in VR you must use a mobile phone & cardboard headset.

Android Phones

- The recommended browser to use for Android is Google Chrome.
- Alternative suitable browsers are: Edge & Firefox.
- There is no setup required for Android phones to view the VR.
- Simply press the VR button, place the mobile phone in the VR cardboard and view the content.

iOS Phones

- The recommended browser to use for IOS is Safari.
- Alternative suitable browsers are: Chrome & Firefox.
- When presented with the onscreen text 'Press The Cardboard Button To Play The Video' press the physical button on your cardboard device to view the content.

iOS Phone - Setup for viewing VR

The default viewing VR experience has the title bar displayed above the content.

If you do not want to see the title bar and want a full screen VR experience follow these steps.

1. Press the 'Share' button on the website, when this is live the link would be "**https://www. australianeggs.org.au/farming/tour/**"

2. Press 'Add To Home Screen'.

3. Press 'Add', The website will now be located on your home screen.

4. Anytime you want to navigate to the website and view full-screen 'VR' content, you will have to open the pinned application from your home screen.
